👤 PROFILE

I am a highly motivated and proactive Cyber Security Analyst with a passion for solving complex computer-related challenges. With strong expertise in Penetration Testing, Red Teaming, and Python, I have honed my skills through a variety of methods, including online courses, hands-on labs, Capture-The-Flag competitions, academic projects, and learning from industry experts via YouTube and other platforms.

Currently, I am pursuing advanced training with EC-Council to further refine my skills and expand my experience in Penetration Testing.

Over the years, I have cultivated excellent work ethic, communication abilities, teamwork, and consultation skills, leveraging a creative approach to meet diverse work conditions and drive sustained growth. I am eager to contribute my knowledge and adaptability to enhance organizational security infrastructure and support users in achieving optimal productivity.

🧠 SKILLS

Auditing — *IT Security System*   •   **Coding** —   •   **Graphics Design** —   •   **Penetration Testing**   •
Network Configurations — *Network security*

📑 CERTIFICATES

- (ISC)² Candidate ⧉
- Certified in Cybersecurity (CC) - (ISC)² ⧉

💼 PROFESSIONAL EXPERIENCE

Cybersecurity Intern, *Nigerian Army Cyber Warfare Command*   07/2023 – 01/2024
This is a thrilling experience at the Nigerian Army Cyber Warfare Command. I was able to explore and work on:
- The Tactics, Techniques and Procedures employed in the Cyber Kill Chain.
- The integration and advancement of Artificial Intelligence in Cyber Operations, Defense and Exploitation.
- Next-Generation SIEM tools.

Computer Threat Investigator,   02/2023 – 07/2023
Choiena Orr, Graduate Program Manager, ANZ
This was a virtual Internship which entailed me
- Investigating a network traffic *Packet Capture (pacap)* file using **Wireshark.** Analysis was done in each element of the recorded **GET** request made by the **HTTP traffic**, using the TCP Stream feature of Wireshark and Hexeditor tool for further analysis.

Cybersecurity Analyst, *Renata J. Dohmen, Global Head of Early*   03/2022
Career Talent Attraction at SAP
This was a Virtual Internship Program at SAP and tasks I covered during the short period were:

- **Auditing Password** used by staff of a company in line with security policy being enforced, **Identifying and mitigating** phishing threats , **configuring a Windows Server 2019** system to meet the company's information security policy and implementing **security patches and upgrades** on operating systems.

🎓 EDUCATION

BSc. Cybersecurity, *Airforce Institute of Technology*   04/2020 – 10/2024 | Kaduna, Nigeria
